## Lofting Theory and Practical

4 Day Course + Additional Days if req    £640 inc VAT

This course is an integral part of our full 47 week boatbuilding course and is also available to external delegates.

This is a 4 day plus course, dependant on the complexity of the lofting project chosen.

Lofting Theory - 2 day classroom based course that teaches the drafting technique and how drawings of boats are interpreted.

Lofting Practical - a 2 day + course that puts into practice the theory learnt on a full scale lofting floor. This includes the creation of patterns used to make templates and components for a boat build.

Students may wish to loft their own boat design or project. We can accommodate this with prior notice. The length of the practical course is subject to the design of boat to be lofted.

For those without a specific vessel in mind, college projects will be available for them to work on.

Students will require drawing equipment and kneepads!

Additional days at £60 per day all inclusive of vat.
