Basic Plumbing and Electrics

2 Day Course

£320 inc VAT

This introductory course gives students a solid grounding in basic marine plumbing and electrics. Electrical theory including electrical definitions, Ohms law, cables, fuses, circuits, batteries, generators, solar, wind chargers and more are covered.

A typical marine domestic hot water system is explained along with engine cooling, fresh water & bilge pump systems, tanks and pipe work, cockpit drains etc.

This course is intended to give a firm foundation for further study and enable participants to design simple systems. A certificate of attendance is given at the end of the course.
